

2017-18 SEMCME Postgraduate Course in OB/GYN

Beaumont Hospital • Royal Oak, MI
Surgical Learning Institute – Classroom 1 & 2

The SEMCME Ob/Gyn Committee established the Postgraduate Course in 1974 in order to enhance resident understanding of physiology and pathology as they apply to the practice of obstetrics and gynecology. In addition, the course serves to update resident knowledge regarding the most current concepts of obstetrics and gynecology, reproductive endocrinology, genetics, and oncology. In recent years, the Course has evolved to incorporate simulation training as a modality for teaching residents these important topics.
